Note:

1. **This time, this website is not linked with any Movie Database or API, because TMDB portal is not working on Indian Server, when I find different way, I will try to link with the clone.**
2. **This time, there is only 1 video in every player, which is mentioned above in the .pdf It can be resolved with linking API.**
3. **There is no authentication process for Username and Password. It can be made to save the dataentry using Google FireBase which is used in the backend, but not in use right now.**
